1. Docker Compose 실습 - Nginx 서버를 Docker Compose로 실행하기
  1)docker run으로 nginx 실행하기
    -Image : nginx:latest
    -Listening Port : 80
    -Host Connection Port : 8080
    -index.html : Hello Docker Compose
    -HTML Directory : /usr/share/nginx/html

    $ docker run -it -p 8080:80 -v ${PWD}:/usr/share/nginx/html/ nginx

  2)docker-compose.yml 생성하기
    version: '3'

    services:
     nginx:
       image: nginx
       ports:
         - 8080:80
       volumes:
         - ./:/usr/share/nginx/html/

  3)실행하기
    $ docker-compose up -d

    -Web Browser로 확인할 것

    $ docker-compose down
